1 Verify that your Android is powered off. 2 Open the battery compartment of your Android device. In most cases, the battery compartment can be opened and accessed by gently prying the back off your device using your fingertips. Advertisement 3 Lift and remove the battery up and out of your Android device. 4 Insert the SIM card into your device with the gold contacts facing down, referring to the diagram displayed next to the SIM card slot for correct placement. The diagram will inform you whether the SIM card should be inserted with the angled corner facing in, or facing out. 5 Replace the battery into the battery compartment. 6 Snap the back case of your device back into place. Your SIM card will now be installed and ready for use in your Android device.[1] Advertisement 1 Verify that your Android is powered off. 2 Look for and identify the SIM card tray, which is usually located on the side of your device. 3 Insert the pointed end of the SIM ejection tool into the tiny hole located next to the SIM card tray. In most cases, the manufacturer of your Android will provide you with the SIM ejection tool at the time you purchase your device. 4 Pull out the SIM card tray gently using your fingertips after the tray pops out of the device. 5 Place your SIM card into the SIM tray so that it properly fits and lies flat. 6 Push the SIM card tray gently back into your Android until it clicks firmly into place. Your SIM card will now be installed and ready for use in your Android device.[2] Advertisement Add New Question Question What should I do if my SIM card will not go back in the card slot after I removed it? If you've got it in most of the way, try to gently nudge it with the end of a needle or paper clip. If you still can't get it, take the phone and the card to your service provider. Question How thin is a SIM card for an Android? All SIM cards are around the same thickness. Full-sized, mini and micro SIM cards are around 0.76 mm, nano SIM cards are around 0.67 mm and embedded SIM cards (eSIMs) are 1 mm or less thick. Ask a Question Advertisement Thanks! Replacing a SIM card on your mobile device or tablet is one of the first things you'll need to do to get your phone or tablet up and running. Make sure your SIM is inserted correctly by following the step-by-step guides below. Generally speaking, mobile phones manufactured in 2014 or earlier will have a removable back cover and battery. Phones like the Galaxy S5, Note4 and earlier devices will have a cover that will need to be removed to insert or change a SIM card. If your device has a removable cover, please follow the steps in the dropdown below. The images in these steps below may not exactly match your phone, but should be similar enough if your device has a removable battery. If your phone doesn't seem to have a back cover that is easily removed, please follow the steps in the section for devices with a sealed battery. Do not force or pry the cover of a sealed mobile device. If you have a Galaxy S6 or newer phone, or any tablet that takes a SIM card, please follow the steps below under Devices with a sealed battery.
